Jackson is doing his maths homework in addition and he needs your help!

Jackson's maths homework contains a lot of addition questions. Given two integers a and b , can you help Jackson calculate the sum of $a + b$?

Input

Your first and only line will contain two space-separated integers a and b .

Output

A single line, containing the value of $a + b$.

Constraints

- $0 \leq a, b \leq 10^9$

Python Template

```
a, b = map(int, input().split())  
# Continue your code here and print your final answer!
```

Example 1

Input

```
10 15
```

Output

```
25
```

Example 2

Input

```
100 100
```

Output

```
200
```

Example 3

Input

```
2004 0
```

Output

2004
